Professional Summary

Detail-oriented Software Engineering student with strong backend skills (Django). Experienced building APIs, managing databases, and implementing secure systems. Knowledgeable in AI. Seeking backend or AI-focused roles to deliver reliable, scalable solutions.

Professional Experience

- **Full Stack Freelancer** Jun 2025 - Present
 - develop end to end full stack app for clients using different technologies and achieving their satisfaction in different sectors
- **Full Stack developer** Qatar (Remote)
Be My Sense Jul 2025 - Oct 2025
 - Implemented a backend server using Node.js and integrated an LLM layer as a service.
 - create the landing page following the design guideline and add SEO optimization to better rank the website.
 - **Tech Stack:** Nodejs,Nextjs,React,tailwindcss,shadcnUI
- **Ai Agent Intern** Jul 2025 - Sep 2025
Masytero Delivery
 - created an inventory agent that recommend restocking and send alert to users when there is stock out and also grape some products that considering to be winning for the store owner
 - built a fast api backend to serve the agent functionality with an interface as demo.
 - **Tech Stack:** langgraph,langchain,Reactjs,FastApi,Prompt Engineering.
- **Ai Developer Intern** Algeria (Remote)
Bastyon Ai Dec 2024 - Mar 2025
 - Optimized ETL pipelines using Airbyte to ensure real-time data delivery, improving data accuracy by 30%
 - Created performance dashboards to monitor system metrics and user engagement
 - Deployed data-driven applications via CI/CD pipelines on OVH Cloud, reducing deployment time by 25%
- **project Intern** Algeria (Remote)
Mooc Lab Jun 2024 - Jul 2024
 - Implemented backend system to handle GPS tracking data collection and analysis
 - Developed data integration between tracking system and admin server
 - Deployed efficient data processing solutions on Raspberry Pi 4 using Node.js and Python

Projects

Blood Donation App

- Implement multi layer of security (super admin,admin,user) and ensure authentication using oauth2 and JWT.
- design notification system to alert users when needed.
- Build a CI/CD to automate deployment using github actions
- document the Backend following the OPENAPI specifications.
- **Tech Stack** : Express,WebSocket,PostgresQL,Prisma,Docker

Draw Web App

- Led the development of a feature-rich drawing application as project owner, overseeing design and implementation of intuitive canvas tools, brush customization, and color selection to empower users in digital creativity.
- Architected and integrated advanced functionalities such as undo/redo, layer management, and a robust archiving system that allows users to securely save, organize, and retrieve their artwork for future editing or sharing.
- Engineered a responsive and user-friendly interface compatible across platforms, ensuring smooth drawing experiences, efficient file management, and seamless parent-level control over project direction and feature prioritization.
-
- **Tech used** : React,Django,Django Rest Framework,Docker,Redis,typescript

Event management platform

- help business owners to create and setup their events and automatically send reminders and facilitate the process of buying tickets and check in with qr code
- **Tech used** : React,Django,Django Rest Framework,Docker,Redis,typescript,celery,celery beat,channels

team collaboration platform

sept 2022 - july 2027

- help agency owner to manage its internal team and client and track the hole cycle of tasks and keep track of the hole process.
- add chat functionality with creating channels for each member
- add webpush notification to the platform when receiving messages
- **Tech Stack**: Nodejs,Reactjs,Typescript,Octenuim,tailwindcss.

Education

- **Software engineering Degree (university constantine2)**
- Data Analyst Certification (DataCamp) – SQL, Tableau, Excel
- Machine Learning (Stanford Online) – Predictive Modeling, Data Cleaning
- Power BI Course (DataCamp) – Dashboard Development, Data Visualization
- Django Rest framework course (udemy)
- aws cloud foundations

Skills

- **Ai and Data**: sklearn,tensorflow,pandas,numpy,langchain,langgraph
- **Programming**: javascript,typescript,java,tailwindcss,python,nodejs,reactjs,django,djangorestframework,docker,aws,ovh,agile,redis,mysql,postgresql,websocket,nginx
